

Foursquare App - Where's the Wifi?

We are a community of freelancers and we want to create a fun web app pointing users to locations to work out of that have free wifi in order to drive traffic to our website. We want users to be able to enter a location they want to work, and have the app return results of places that have wifi.

Scope of Work:

- Show a List of places with free wifi based on user location

Deadline:

- Wireframes by Tuesday
- Beta by Thursday
- Final by the following Monday.

Deliverables:

- Project up on github
- Project on URL, can be ghpages url.
